REQUEST FOR CORRECTED NOTICE OF ALLOWANCE

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Madam:

Applicant hereby requests that a Corrected Notice of Allowance be issued in the above-identified patent application. The Notice of Allowance received by Applicant, a copy of which is attached hereto (as Exhibit "A"), has an error in the reflection of the small entity status of the Applicant. The small entity status should reflect "No." Although Small Entity status may have been initially established, on January 22, 2002 Applicant filed a "Request for Correction of Small Entity Status" and paid any deficient fees. (Attached as Exhibit "B") On February 5, 2002, the U.S. Patent and Trademark Office provided notice of acceptance of the deficient fees. (Attached as Exhibit "C")

Applicant additionally requests that all pertinent U.S. Patent and Trademark Office records relating to the subject application be changed to reflect this correction.

Examiner's Statement of Reasons for Allowance

1. Claims 1, 3-9, 11-13, 16, 17, and 21-26 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the primary reason for allowance is that the prior art fails to teach or reasonably suggest applying a weight factor to the error measure for each of said plurality of known reference colors to obtain a respective weighted error measure for each of the plurality of known reference colors and obtaining a color correction matrix by simultaneously reducing the weighted error measure for each of the plurality of known reference colors.

As for claim 6 (renumbered claim 9), the primary reason for allowance is that the prior art fails to teach or reasonably suggest an image processor to color correct images according to a color correction matrix obtained by simultaneously reducing respective weighted error measures, each or said weighted error measures being calculated by applying a weight factor to a squared difference between signals seen for a known reference color from said color image array of the image sensor device and signals expected to be seen for said reference color.

With regard to claim 13 (renumbered claim 17), the primary reason for allowance is that the prior art fails to teach or reasonably suggest obtaining a color correction matrix for said pixels, said color correction matrix being one which takes into account correction for at least the color white, three primary colors, and two other non-primary colors by simultaneously reducing error measures relative to each color, wherein respective error measures for said non-primary colors are weighted such that said color correction matrix corrects for some of said non-primary colors more than said primary colors, each error measure representing a squared difference

Art Unit: 2622

between signals actually seen for a known reference color from said color image array and said signals expected to be seen for each of said reference outputs.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
